

ROV Quick Release Shackles

ROV Quick Release Shackles are specifically designed for ROV use, to safely and precisely release heavy equipment in the deep ocean. ROV Quick Release Shackles provide extremely reliable and trouble free operation. Their unique design maintains full integrity of the shackle while incorporating many safety features that prevent any accidental release of the load during handling. The operation requires just a few simple steps through the use of a manipulator. ROV Quick Release Shackles are painted bright yellow which makes them clearly visible in the ocean and helps in achieving the safety objectives of the subsea operations. We offer Load Certification to qualify for oilfield certification requirements.

Specifications

Working Load Limit (WLL)

- 8.5 ton, 9.5 ton, 17 ton, 25 ton, 35 ton, 40 ton, 55 ton, 85 ton, 120 ton, 150 ton, 175 ton, 225 ton, and 400 ton

Features

- Specifically designed for ROV operation
- Reliable

Applications

- Secure Release of Heavy Equipment in the deep ocean

Load Certification

- Available for twice the rated load (WLL)
